DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 10 of U.S. Patent No. 6,642,736. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1 and 7 of U.S. Patent No. 6,642,736 covers all the claimed limitation except for a data memory having two memory sections. It is well known to make the data memory have plurality of memory sections where needed (see MPEP *In re Ruff*, 256 F.2d 590, 118 USPQ 340

(CCPA 1958)). It would have been obvious to a person having ordinary skill in the art at the time the invention was made to make the data memory of U.S. Patent No. 6,642,736 to have two memory sections since the mere fact that the data memory of U.S. Patent No. 6,642,736 and the data memory of the claimed invention are functional and mechanical equivalents and further U.S. Patent 6,642,736 states in claim 1, "...data memory to store the digital test outputs from the A/D converter circuit of said semiconductor IC... and the digital test outputs of said testing A/D converter circuit and an analyzer portion to analyze each of said digital test outputs stored in said measure data memory..."

Conclusion

2. Applicants' arguments see pages 2-3, filed May 20, 2004, with respect to the claim rejections under 35 U.S.C. 112, second paragraph have been fully considered and are persuasive. The rejection of claims 1-5 and 7-12, under 35 U.S.C. 112, second paragraph, has been withdrawn.

3. Claims 2-5 and 7-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. **THIS ACTION IS MADE FINAL.** Applicants are reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2829

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
